

CROSSWORD CYBERSECURITY

Crossword's vision is to partner with organisations to keep them secure in the digital world. We offer a range of cybersecurity solutions to help companies understand and reduce cybersecurity risk.

Our team of expert cybersecurity experts leverage years of experience in national security, defence and commercial cyber intelligence and operations. We also work closely with UK university research teams and our products and services are often powered by research-driven insights.

We design and deliver bespoke, cost-effective cybersecurity solutions that are tailored to your business needs. We work with medium and large clients including FTSE and S&P listed companies in various sectors, such as defence, insurance, investment and retail banks, private equity, education, technology and manufacturing.

ADVISORY SERVICES

CROSSWORD CONSULTING

Our experienced consulting team can quickly and accurately assess and support clients of all sizes in improving their cybersecurity posture in line with industry best practice.

- » Cyber maturity and risk assessments
- » Certifications such as Cyber Essentials or ISO27001
- » Vulnerability and penetration testing
- » Remote, retained CISO service to supplement your inhouse cybersecurity team
- » Cybersecurity advice and training

MANAGED SERVICES

NIGHTINGALE SECURITY MONITORING

A comprehensive AI-based security monitoring service, offering extensive visibility of cybersecurity threats and incident response without the need for costly infrastructure or staff.

- » Real-time threat intelligence
- » Cloud, endpoint and network threat monitoring
- » Vulnerability management
- » 24/7 incident response and resolution
- » Incident forensics and reporting

OUR PRODUCTS

RIZIKON
ASSURANCE

An online third party assurance platform that automates your supply chain cybersecurity and supplier management processes and assists with regulatory compliance.

- » Secure online supplier questionnaires in your own branded portal
- » Audit trails on all answers
- » 360 degree supplier scorecards and a dashboard of risk across all suppliers
- » Darkbeam instant digital risk ratings
- » Alerts, reminders and notifications to ensure continued assurance

TRILLION

A breached account mining platform that tracks and analyses billions of stolen credentials, hunting for emails and passwords that could belong to your employees and customers.

- » Continuous monitoring of dark markets and criminal forums
- » Intelligent risk engines identify which leaked credentials have highest risk
- » Data filters and automatic live account detection
- » Daily threat summary emails and reports
- » Alerts and interactive platform for employees

IDENTIPROOF

An easy to implement solution for creating and authenticating identities online, reducing the risk of fraud and identity theft, while ensuring that the individual's privacy is protected.

- » Based on W3C standard for Verifiable Credentials
- » Creates tamper proof online credentials
- » Credentials are held in a secure mobile wallet
- » Easy to integrate with existing systems via API
- » Use cases include: Covid vaccine passes, educational qualifications, insurance certificates
